### Business Activity Fair, but the General Attitude Is One of Watchful Waiting.

New York, July 6.—Watchful waiting was the attitude of the stock market this morning, although business activity was fair. As regards Mexican affairs the highly satisfactory opinions were not abated, but a new impulse

was lacking.

Partly this is attributed to the fact that for some time past dealings have been largely professional. The situation was that other factors and influences were being considered by the speculative interest. The harvest sit-uation was one; two others were the progress of the European war, and the

Presidential campaign.

Possible early peace in Europe was considered in regard to some uncertainty in munition stocks. There was a further influence in the reported dis-mantling of the munitions plant of the Westinghouse Airbrake Company. This would indicate a wind-up of war

At the opening fractional advances were distributed through the general list. There was a fair volume of business during the first hour. Activity was lessened, however, as the market advanced. Some irregularity was developed by the industrials and specialties, pressure marked zinc stocks especially, and there was a sharp reaction in mercantic marine preferred. Sugar issues reached a higher level owing to a resumption of active pool

operations.

In the late afternoon there was little change in speculative condition, prices moving uncertainly.

There was a firm tendency in bonds with a good demand for Anglo-French fives, and municipal issues.

market from Logan & Bryan:

"While Reading and a few specialities men, expressed the belief last night that were higher, the remainder of the roster if the government would properly pay its were slightly lower. A reversal of form was experienced after reports were circulated to the effect that Villa was advancing towards the American border, A plan to raise several thousand dolstrong coterie is apparently arrayed on the long side of the stock list, favoring the 30,000 government employes of the large part steel and Reading but the District to contribute ten cents each or the long side of the stock list, favoring in large part steel and Reading, but the lost of the contribute ten cents each on outside participation attracted so far has not been very substantial. While in some quarters there is a tendency to anticipate a favorable outcome with respect to the current controversy between the managers and railroad employes, still the matter will not be definitely settled until the end of the current month at the earliest. We see no reason to alter the view that the long account in the industrial of the contribute to contribute ten cents each on their next pay day, was approved by the leaders of the Citizens' Welfare Association last night.

First deed of trust notes (first mort-sages), well secured on real estate in the Dis-trict of Columbia, constitute "gilt-ofge" in-restments. They do not depend upon the financial responsibility of individuals or cor-porations for their stability, and are exempt from transition as personal property.
